No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1992 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

This journal is printed on acid-free paper.

Contents of Volume 59

Number 1, October 1992

Special Issue Dedicated to the Memory of Irving J. Selikoff

Arthur L. Frank (with comments by Vera Reitman). Introduction 1

Herbert K. Abrams. Some Hidden History of Occupational Medicine 23

Arthur C. Upton. The First Hundred Years of Radiation Research: What Have They Taught Us? 36

Ruth Lilis, Arthur Miller, James Godbold, Steven Benkert, Xiaochu Wu, and Irving J. Selikoff. Comparative Quantitative Evaluation of Pleural Fibrosis and Its Effects on Pulmonary Function in Two Large Asbestos-Exposed Occupational Groups—Insulators and Sheet Metal Workers 49

Michael Gochfeld. Medical Surveillance and Screening in the Workplace: Complementary Preventive Strategies 67

Lorann Stallones, John R. Nuckols, and Joseph K. Berry. Surveillance around Hazardous Waste Sites: Geographic Information Systems and Reproductive Outcomes 81

Howard M. Kipen and James Craner. Sentinel Pathophysiologic Conditions: An Adjunct to Teaching Occupational and Environmental Disease Recognition and History Taking 93

Tee L. Guidotti. Hidden Assumptions in Environmental Research. . 101

Robert J. McCunney, Reid Boswell, and Joseph Harzbecker. Environmental Health in the Journals 114

Eugene S. Kumekawa, Andrea A. Lash, and Charles E. Becker. Challenges of Worker Notification in Neurotoxic Studies of the Central Nervous System 125

Jeffrey L. Levin and Joanne L. Pizzino. What Is a Specialist? The Role of Board Certification in Occupational Medicine 132

Michael F. McCann. Occupational and Environmental Hazards in Art 139

Alvin S. Teirstein. Advances in Lung Cancer? 145

Kaye H. Kilburn, Raphael H. Warshaw, and John C. Thornton. Expiratory Flows Decreased in Los Angeles Children from 1984 to 1987: Is This Evidence of Effects of Air Pollution? 150

HENRY A. ANDERSON, LAWRENCE P. HANRAHAN, DELORIS N. HIGGINS, AND PRISCILLA G. SAROW. A Radiographic Survey of Public School Building Maintenance and Custodial Employees 159

BARRY S. LEVY AND ANDREW SEPLOW. Asbestos-Related Hazards in Developing Countries 167

CARLO H. TAMBURRO. Chronic Liver Injury in Phenoxy Herbicide-Exposed Vietnam Veterans 175

ELLEN DAR, MARTY S. KANAREK, HENRY A. ANDERSON, AND WILLIAM C. SONZOGNI. Fish Consumption and Reproductive Outcomes in Green Bay, Wisconsin 189

MARY S. WOLFF, ALF FISCHBEIN, AND IRVING J. SELIKOFF. Changes in PCB Serum Concentrations among Capacitor Manufacturing Workers 202

WILLIAM DANIELL, SCOTT BARNHART, PAUL DEMERS, LUCIO G. COSTA, DAVID L. EATON, MARY MILLER, AND LINDA ROSENSTOCK. Neuropsychological Performance among Agricultural Pesticide Applicators 217

CATHERINE KARR, PAUL DEMERS, LUCIO G. COSTA, WILLIAM E. DANIELL, SCOTT BARNHART, MARY MILLER, GENE GALLAGHER, S. W. HORSTMAN, DAVID EATON, AND LINDA ROSENSTOCK. Organophosphate Pesticide Exposure in a Group of Washington State Orchard Applicators 229

MYRON A. MEHLMAN. Dangerous and Cancer-Causing Properties of Products and Chemicals in the Oil Refining and Petrochemical Industry. VIII. Health Effects of Motor Fuels: Carcinogenicity of Gasoline—Scientific Update. 238

MARK R. CULLEN, LAWRENCE R. SOLOMON, PATRICIA E. PACE, PATRICK BUCKLEY, THOMAS P. DUFFY, PETER MCPHEDRAN, KARL T. KELSEY, AND CARRIE A. REDLICH. Morphologic, Biochemical, and Cytogenetic Studies of Bone Marrow and Circulating Blood Cells in Painters Exposed to Ethylene Glycol Ethers 250

ROBERT MALKIN, PAUL BRANDT-RAUF, JOSEPH GRAZIANO, AND MICHAEL PARIDES. Blood Lead Levels in Incinerator Workers . . 265

WEI-NAN CHENG AND JIAN KONG. A Retrospective Mortality Cohort Study of Chrysotile Asbestos Products Workers in Tianjin 1972–1987 271

Number 2, December 1992

Special Symposium Issue

Getting the Lead Out: Priorities for the 1990's—Research and Clinical Management, May 8–9, 1991

Philip J. Landrigan and Anita Curran. Introduction. Lead—A Ubiquitous Hazard 279

Paul Mushak. Perspective. Defining Lead as the Premiere Environmental Health Issue for Children in America: Criteria and Their Quantitative Application 281

Daniel Wartenberg. Screening for Lead Exposure Using a Geographic Information System 310

William G. Guthe, Robert K. Tucker, Eileen A. Murphy, Randy England, Ed Stevenson, and Joan C. Luckhardt. Reassessment of Lead Exposure in New Jersey Using GIS Technology . . 318

Andrew Christian Todd, Fiona Ellane McNeill, and Bruce Andrew Fowler. *In Vivo* X-Ray Fluorescence of Lead in Bone . . 326

REGULAR ARTICLES

HUMAN STUDIES

David V. Bates. Health Indices of the Adverse Effects of Air Pollution: The Question of Coherence 336

Eugenija Zuskin, Bozica Kanceljak, E. Neil Schachter, Theodore I. Witek, Saul Maayani, Satindra Goswami, Zvi Marom, and Nicholas Rienzi. Immunological Findings in Hemp Workers 350

EPIDEMIOLOGY STUDIES

Douglas W. Dockery, Joel Schwartz, and John D. Spengler. Air Pollution and Daily Mortality: Associations with Particulates and Acid Aerosols 362

Frederick W. Lipfert and Thomas Hammerstrom. Temporal Patterns in Air Pollution and Hospital Admissions 374

IN VIVO STUDIES

Patrick J. Haley, Gregory L. Finch, Mark D. Hoover, James A. Mewhinney, David E. Bice, and Bruce A. Muggenburg. Beryllium-Induced Lung Disease in the Dog Following Two Exposures to BeO 400

Terry Gordon. Dose-Dependent Pulmonary Effects of Inhaled Endotoxin in Guinea Pigs 416

Enrico Bergamaschi, Antonio Mutti, Maria Concetta Bocchi, Rossella Alinovi, Giorgio Olivetti, Gian Marco Ghiggeri, and Innocente Franchini. Rat Model of Perchloroethylene-Induced Renal Dysfunctions 427

Kasuhito Yokoyama and Shunichi Araki. Assessment of Slow Axonal Transport in Lead-Exposed Rats 440

Raymond W. Nims, Lisa E. Beebe, Konstantin H. Dragnev, Paul E. Thomas, Stephen D. Fox, Haleem J. Issaq, Collins R. Jones, and Ronald A. Lubet. Induction of Hepatic CYP1A in Male F344/NCr Rats by Dietary Exposure to Aroclor 1254: Examination of Immunochemical, RNA, Catalytic, and Pharmacokinetic Endpoints 447

Jolanta Łukowicz-Ratajczak and Jerzy Krechniak. Effects of Deltamethrin on the Immune System in Mice 467

IN VITRO STUDY

Manfred Reitz, Kunti DasGupta, and Ludwig Brandt. Detection of DNA Damage in Stimulated Human Lymphocytes after Enflurane Exposure *in Vitro* 476

Author Index for Volume 59 485

Cumulative Subject Index for Volumes 57–59 487

INSTRUCTIONS TO AUTHORS

Manuscripts. Environmental Research publishes original reports describing studies of the toxic effects of environmental agents in humans and animals. The principal aims of the journal are to define the etiology of environmentally induced illness, and to increase understanding of the mechanisms by which environmental agents cause disease.

The study of environmental health is inherently multidisciplinary. Therefore, the journal welcomes relevant articles in:

- epidemiology and risk analysis
- toxicology
- environmental and occupational medicine
- the neurosciences
- pathology
- pharmacology
- reproductive biology
- biochemistry
- molecular and cellular biology
- mineralogy

Reports which bridge one or more of these disciplines will be particularly encouraged, as will studies employing biological markers of toxic exposure and effect.

Occasional critical reviews and selected book reviews will be included.

Submission of Manuscripts. Three copies (an original and two copies) should be submitted to:

Environmental Research
Editorial Offices
Division of Environmental and Occupational Medicine
Department of Community Medicine
Mount Sinai School of Medicine
1 Gustave L. Levy Place, Box 1057
New York, NY 10029

The original and two copies must include photocopies of all tables and figures.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Environmental Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All papers will be published in English.

Form of Manuscript. Manuscripts should be typewritten (not mimeographed) with double or triple spacing and wide margins on high-quality bond paper. Subdivision of the article into *Abstract* (50–200 words), *Introduction, Materials and Methods, Results, Discussion, Conclusions, Acknowledgments, and References* is recommended. In addition, section headings are often useful.

Page 1 of the manuscript should contain the article title, author's name, and affiliation (include zip code where applicable). Page 2 should contain a proposed running head of fewer than 40 characters and the address of the person to whom proofs are to be sent. Number all pages consecutively beginning with the title page. Include five descriptive key words for computer-aided searching.

Abbreviations. Follow the usage established by *Chemical Abstracts.* If others are utilized define on first use.

Figures. Number all figures consecutively with Arabic numerals; legends should be typed together on a separate sheet. Lettering on the original figures should be large enough to take a reduction of 50–60 percent. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8½ × 11 in. Grid lines that are to show in the photoreproduction should be inked in black. Photographs should be glossy prints (5 × 7 or 8 × 10 in.) with strong contrasts. X-rays should be right-reading glossy prints. Providing an overlay that indicates the most critical areas of halftones will aid in ensuring high-quality reproduction. Illustrations in color can be accepted only if the authors defray the cost.

Tables. Number all tables in order of appearance with Arabic numerals; type each table double-spaced on a separate page, including a short descriptive title typed double-spaced above the table. Footnotes to tables indicated by superscript lowercase letters, ^{a,b}, etc., should be typed double-spaced at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes. Text footnotes should be avoided whenever possible.

References. These are to be cited in the text by the author's name and year of publication. References should be listed alphabetically in an unnumbered list at the end of the paper in the following style:

Coleman, D. C., Reid, C. P. P., and Cole, C. V. (1983). Biological strategies of nutrient cycling in soil systems. *In* "Advances in Ecological Research" (A. MacFayden and E. D. Ford, Eds.), Vol. 13, pp. 1–55. Academic Press, New York/London.

Rice, E. L. (1984). "Allelopathy," 2nd ed. Academic Press, New York.

Takács, S., and Tatár, A. (1987). Trace elements in the environment and in human organs. I. Methods and results. *Environ. Res.* **42,** 312–320.

The names of journals should be abbreviated according to *Index Medicus,* 1980, or *Chemical Abstracts Service Source Index,* 1985. Include in the reference list articles that are "in press," but "manuscript in preparation," "personal communication," and "unpublished observation" are to be avoided.

Reprints. A reprint order form will accompany the proofs. The corresponding author receives 50 reprints free of charge, and additional copies may be ordered.

Correspondence. Editorial correspondence concerning the manuscript should be addressed to:

Environmental Research
Editorial Offices
Division of Environmental and Occupational Medicine
Department of Community Medicine
Mount Sinai School of Medicine
1 Gustave L. Levy Place, Box 1057
New York, NY 10029

Correspondence concerning manuscripts in production and proofs should be addressed to:

Environmental Research
Production Department
Academic Press, Inc.
Journal Division
1250 Sixth Avenue
San Diego, CA 92101

Correspondence and information concerning subscriptions should be addressed to:

Academic Press, Inc.
Journal Subscription Department
6277 Sea Harbor Drive
Orlando, FL 32887-4900

Personal Computer Disks. Manuscripts may be submitted to *Environmental Research* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this information for authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing disks for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, Inc., 1250 Sixth Avenue, San Diego, California 92101; telephone: (619) 699-6415; fax: (619) 699-6800).
